DynaMed Plus

Search
To find information in DynaMed Plus, type a term in the search box or browse by specialty:

Depending on the topic, search results will include conditions, images, drugs, differential diagnosis, and more.

For a condition, you can click right into the section you’re interested in. A menu on the left allows you to navigate from section to section.
DynaMed Plus includes references and levels of evidence. You can click on the links within the text to get more information.

- prophylactic antibiotics may decrease otitis media, tonsillitis, and possibly pneumonia in children and adolescents with measles [level 2 [mid-level] evidence]
  - based on Cochrane review of trials with methodologic and statistical limitations
  - systematic review of 7 randomized or quasi-randomized trials comparing antibiotics vs. placebo or no treatment (control) for prevention of complications in 1,263 patients < 18 years old with clinically diagnosed measles
  - all trials had unclear or inadequate allocation concealment
  - antibiotics included co-trimoxazole, other sulfa antibiotics, penicillins, and tetracyclines

If you’re looking for something specific, you can search within a topic.

**Topic Alerts**
If you want to receive email updates on a topic, click on the “Follow” link.

**Recent Updates**
The DynaMed home page includes a few of the most recent updates. Click on “View All” to see more.

When you’re in the “View All” mode, you can choose to see recent updates for a particular category and/or the most recent practice changing updates. From here, you can also choose to follow particular updates.

**Calculators**
Click on Calculators to find calculators, dose converters, decision trees, and more.
Mobile App
The DynaMed Plus app works with iOS and Android devices.

Step 1: Download the app from the iTunes or Google Play app store

Step 2: Authenticate the App
You can authenticate the app using one of three methods:
- Use the Institutional Network option if you are on campus and your device is connected to GVSU’s wifi network.
- Access DynaMed Plus on the web and create a personal account.
- Access DynaMed Plus on the web and send yourself a link to authenticate the app.

After installing the app and downloading the DynaMed Plus content, the app can be used offline without a wireless signal. A wireless signal is required to perform updates to the DynaMed Plus content when updates become available.

For more information, see the DynaMed Plus App guide.
